THE
TILE
COLLECTION

**IS
DESIGNED
FOR**

simple living, a small size for you,
Its where you can get cosy,
where you live, your special corner.

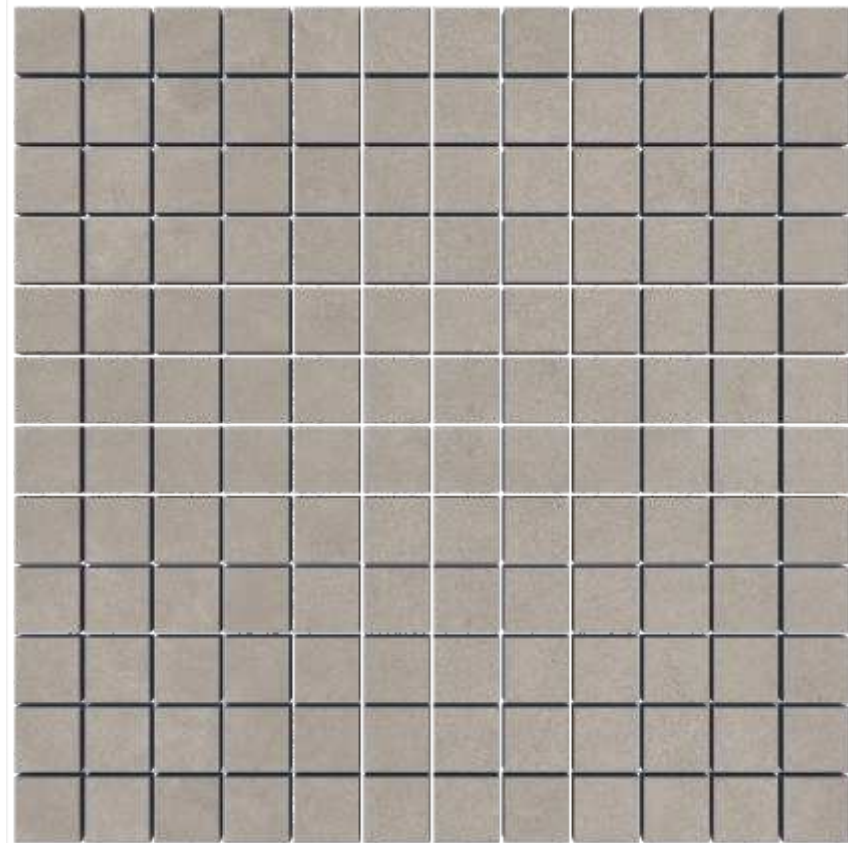

Positioned towards state-of-the-art technical production, the visible surface of the ceramic High-Tech technology is shaped on the basis of mineral elements with a high decorative value. These materials are chosen by the following three features: colour, brightness and appearance, while being precisely prepared for all ceramic models.

TECHNOLOGY

**we connect
designs based on
matching variants.**

Perfection lies in the balance between style and technology, which together outline creativity, stringent design, respectful of people and their rules for living.

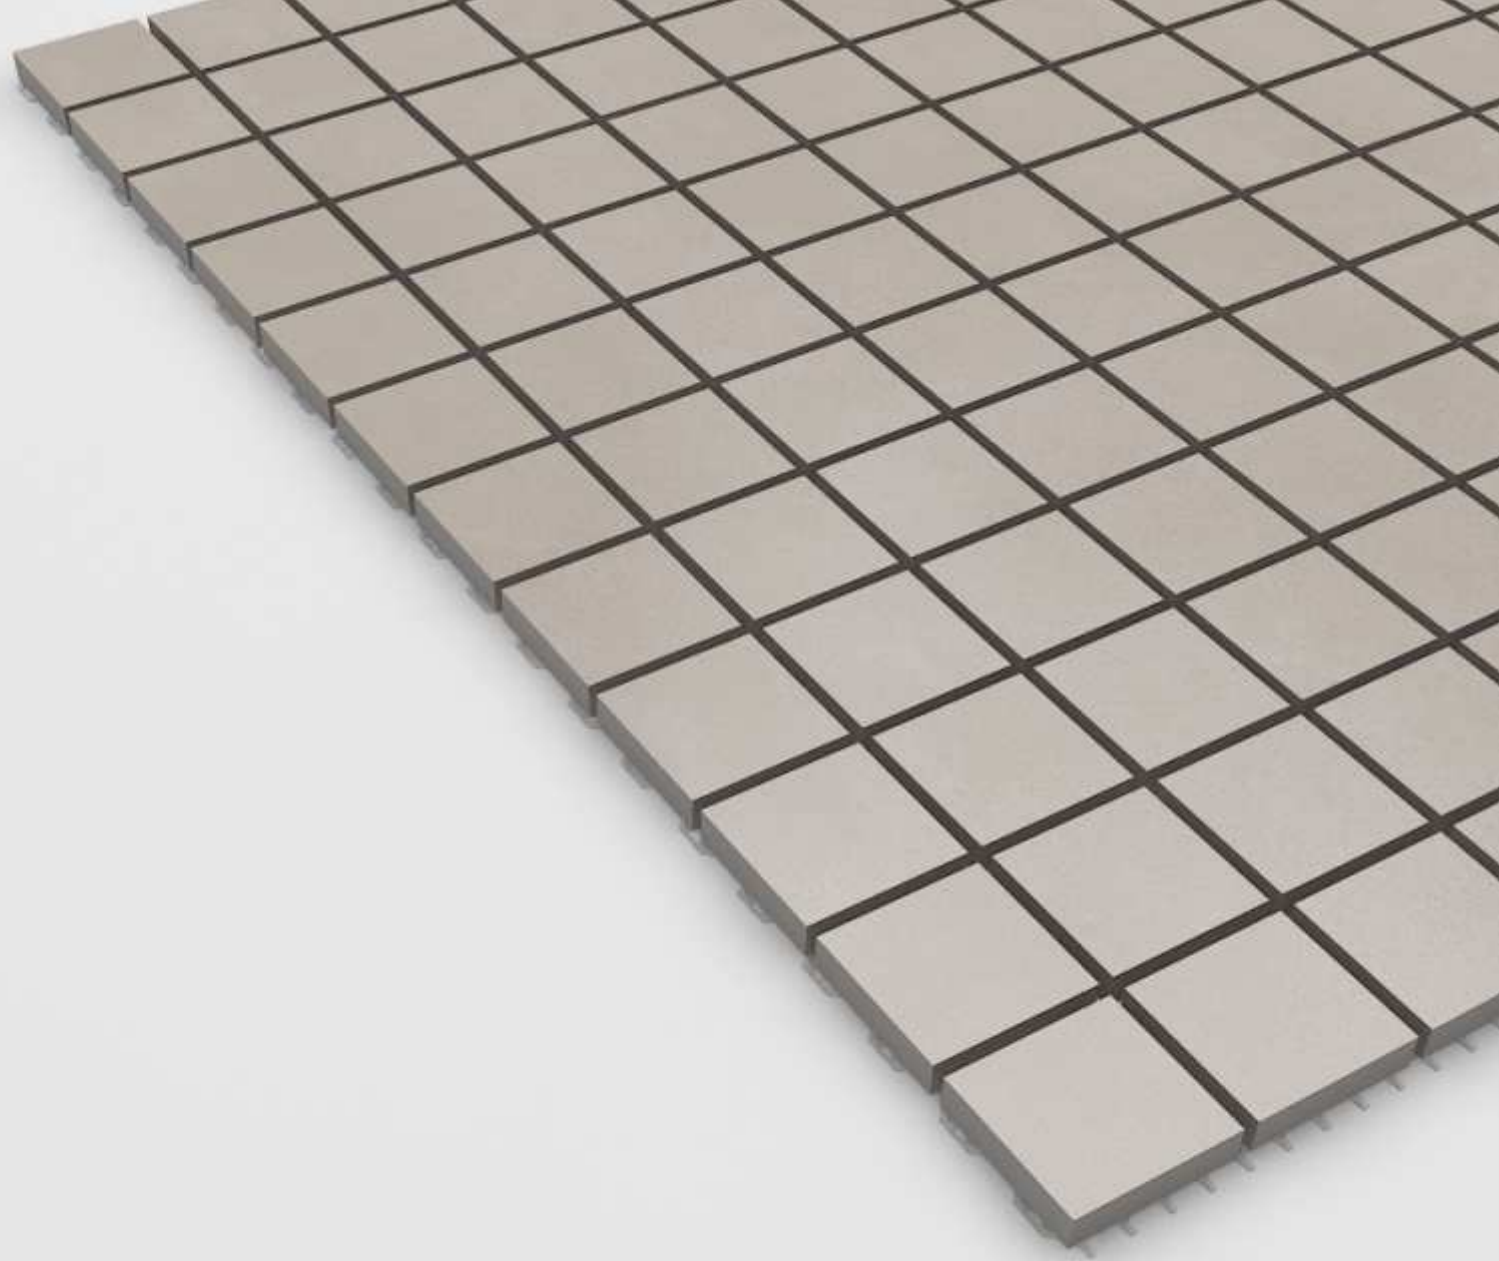

EVERY SPACE NEEDS ITS OWN SHAPE.

The mosaic tesserae are supplied net mounted with a 1.6 mm joint on fibre glass net sheets sized 30x30 cm. While size 1.2x1.2 cm is supplied net mounted with a 1.1 mm joint.

SMOOTH SURFACE DESIGN

Depending on the material they are made from, they can be easily applied to flat and curved surfaces, used to cover large areas or to provide a simple accent or contrast.

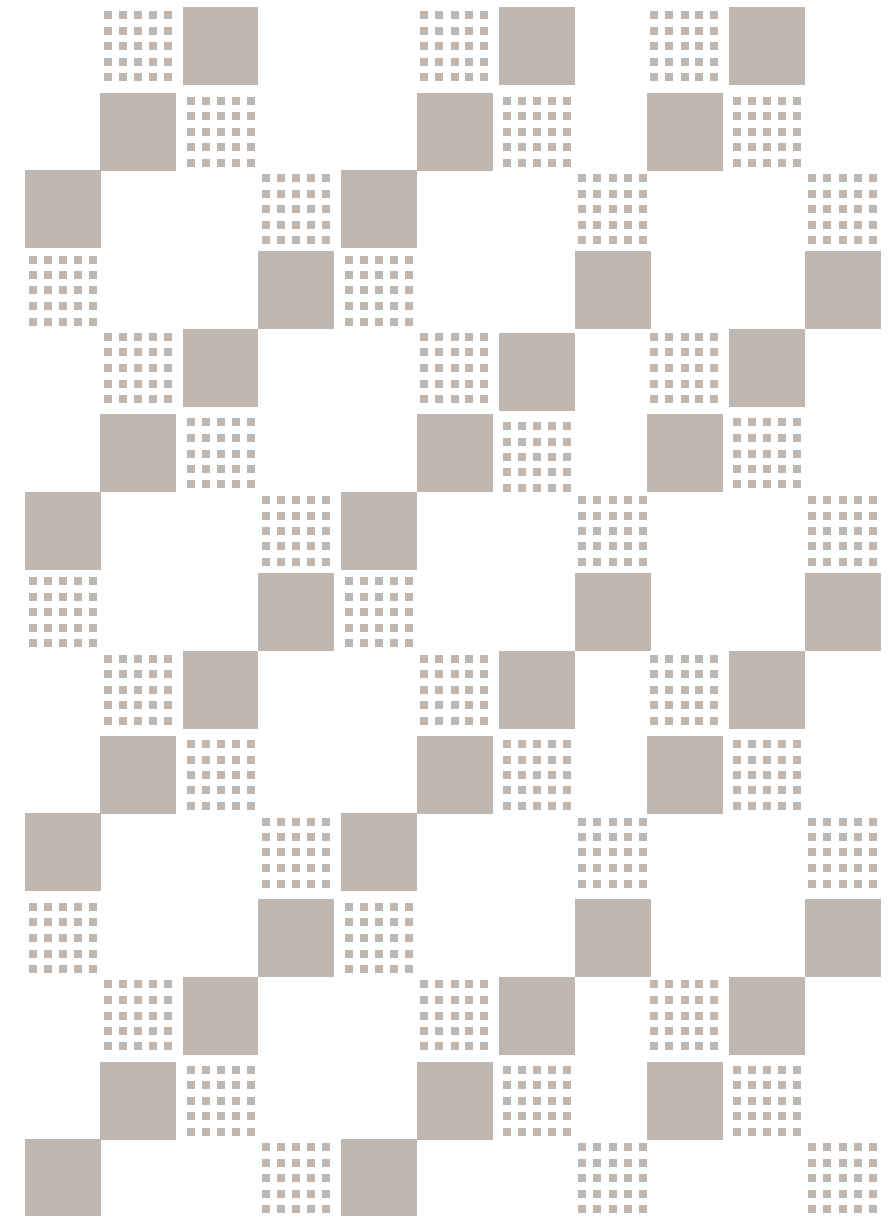

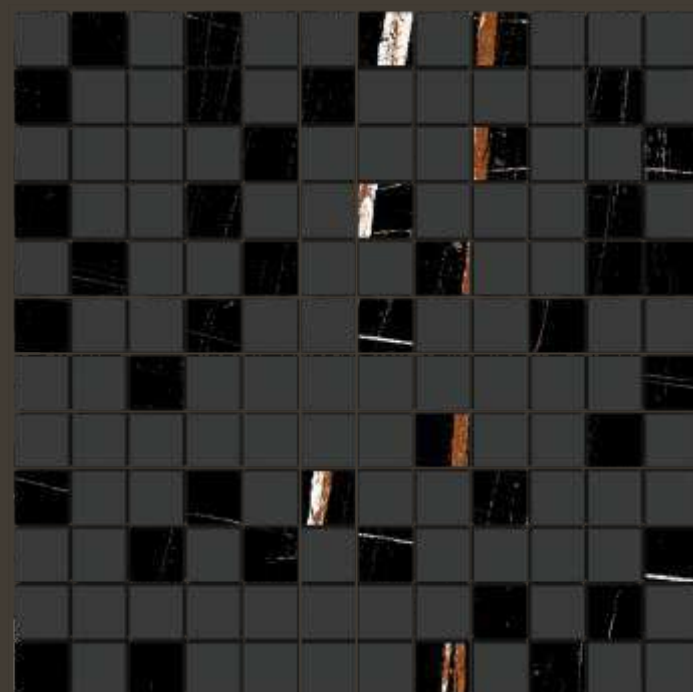

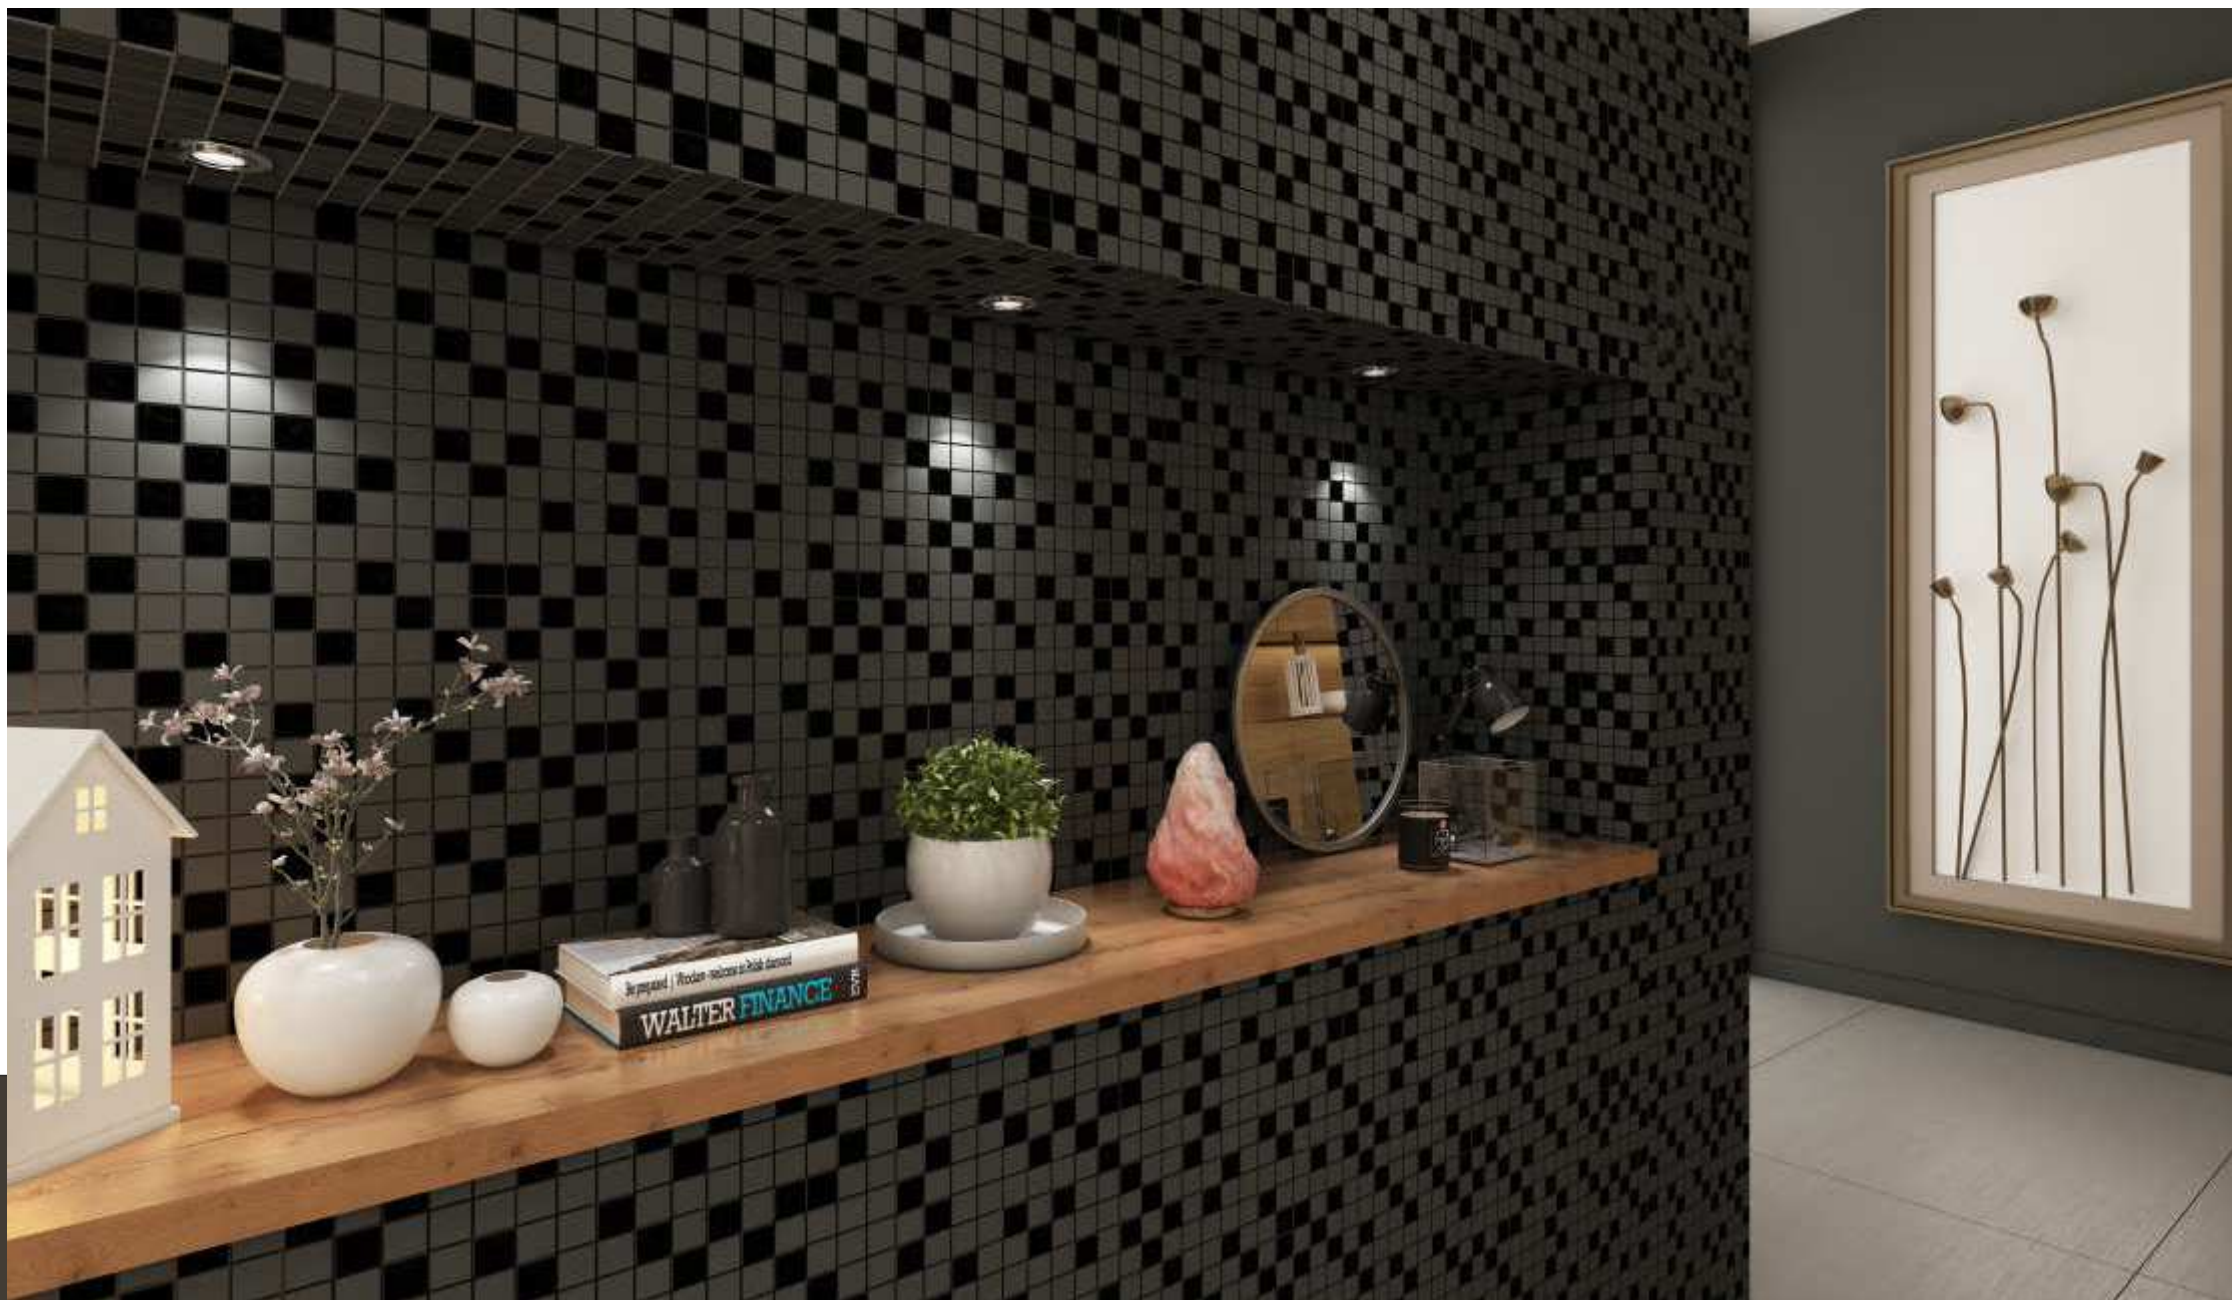

Rubik

collection

Checks that crisscross and ooze with a sharp and catchy view of the spaces. Designed to impart breathtaking dynamism to all the spaces.

parallelogram collection

We take pride in evolving designs that effectively communicate a wide range of emotions and capture Nature in its various moods. We strive to vivify the spaces in this way to embody the inhabitants' attributes and personalities. Our entire research and development process hinges on how we can animate these spaces with tiles that epitomize the core values of those who reside in it or use it. The light organic matter and elegant shapes ensure a rare touch of comfort and exuberance at the same time.
